PROFESSIONAL SUMMARY

Information Technology graduate (May 2026) with hands-on IT support internship experience at Concentrix, covering hardware/software troubleshooting, network diagnostics, Active Directory administration, and IT asset lifecycle management. Comfortable working directly with end-users on-site and resolving multi-platform technical issues. Certified in IT Customer Support, ITIL 4, and Computer Troubleshooting. Open to day or night shift schedules; available immediately.

WORK EXPERIENCE

IT Support Intern — Concentrix

Dec 2025 – Feb 2026

- Provided on-site desktop support for 10–15 devices daily, diagnosing and resolving OS errors, peripheral failures, application conflicts, and connectivity issues
- Performed full hard drive formatting, OS reinstalls, and application repairs on desktops and laptops to resolve persistent system issues
- Performed basic Active Directory administration including moving users to their assigned Organizational Units (OUs)
- Deployed, configured, and decommissioned old PCs following IT asset lifecycle procedures, ensuring zero data-handling incidents
- Diagnosed LAN connectivity issues by checking physical cable connections, switch ports, and verifying IP address configuration and VLAN assignment
- Maintained accurate records of company IT assets and devices under supervisor guidance, supporting inventory accuracy across the support team
- Utilized BigFix to deploy software, install and uninstall applications, and monitor device details across managed endpoints

CCTV Installation Assistant — Our Lady of Guadalupe Minor Seminary

2026

- Assisted in the physical installation of CCTV cameras including wall/ceiling mounting and cable routing
- Connected cameras to DVR units and verified proper feed and recording functionality

CAPSTONE PROJECT

Freight Management System — Bestlink College of the Philippines

2025 – 2026

- Built a full-stack freight management platform with modules for Accounts Payable, Accounts Receivable, and Collections
- Designed the database schema and core system workflows, then implemented a responsive UI connected to backend logic for end-to-end functionality

Tech stack: PHP, MySQL, HTML/CSS, JavaScript, Bootstrap

TECHNICAL SKILLS

- **Hardware:** PC assembly from components, RAM/HDD/peripheral replacement, hardware diagnostics and repair
- **Software:** Windows 10/11 installation, formatting & reimaging, application troubleshooting and reinstallation, OS error resolution
- **Programming:** PHP, JavaScript, HTML/CSS, SQL/MySQL, Bootstrap
- **Microsoft Office:** Microsoft Word, Microsoft PowerPoint, basic Microsoft Excel
- **BigFix:** Software deployment, application installation/uninstallation, and device detail monitoring across managed endpoints
- **Active Directory:** Password resets, user detail updates, and Organizational Unit (OU) management
- **Networking:** Wired LAN connectivity checks, switch port verification, IP address configuration, VLAN assignment checking

SOFT SKILLS

- **Communication:** Explained technical issues in simple, non-technical language to end-users during on-site support
- **Time Management:** Handled multiple assigned support tasks and hardware setups simultaneously while meeting daily IT operations demands
- **Adaptability:** Quickly learned internal IT tools, workflows, and company systems within the first weeks of internship at Concentrix
- **Attention to Detail:** Ensured accurate documentation of troubleshooting steps and assisted in maintaining precise IT asset records
- **Critical Thinking:** Diagnosed root causes of recurring hardware and connectivity issues rather than applying temporary fixes

EDUCATION

Bachelor of Information Technology — Bestlink College of the Philippines

July 2022 – May 2026

- Relevant Coursework: Networking, Database Management, Web Development, System Analysis

CERTIFICATIONS

- IT Customer Support Basics — Cisco Networking Academy (2026)
- Introduction to ITIL® 4 — Simplilearn SkillUp (2026)
- Basic Computer Troubleshooting — TESDA PMDTAC (2023)
