OBJECTIVE

Motivated and detail-oriented IT graduate with hands-on experience in web development, troubleshooting, and system support. Skilled in building responsive websites and developing functional web applications using modern technologies. Passionate about software development, problem-solving, and continuously learning new technologies. Seeking an opportunity as a Junior Developer or Web Developer where I can contribute and grow professionally.

PROJECT

Freight Management System

- Developed modules for Accounts Payable, Accounts Receivable, and Collection processes.
- Designed database structures and system workflows.
- Created responsive user interfaces and integrated backend functionality.
- Improved data organization and transaction management.

Student Information System

- Developed a web-based Student Information System with role-based access for Admin, Teachers, and Students.
 - Implemented online enrollment management with student registration and approval features.
 - Created modules for subject adding, subject management, and academic record monitoring.
 - Developed a payment agreement section showing required school fees such as tuition, books, uniforms, and other student expenses.
-
